E-Commerce Advertising Campaign Performance Report

1. Executive Summary

This analysis evaluates the performance of multiple advertising campaigns across several marketing channels including Google Ads, Meta Ads, TikTok Ads, Email Marketing and Affiliate Marketing.

The objective of this analysis was to assess campaign effectiveness, marketing efficiency and revenue contribution by platform and campaign, enabling better allocation of marketing budgets and improved campaign optimization.

Overall campaign performance:
• Total Revenue: $4.27M
• Total Advertising Spend: $5.2M
• Total Conversions: 59,874
• Average ROAS: 13.57

The results indicate that several marketing channels and campaigns are performing strongly, while others present opportunities for optimization.

2. Revenue Performance by Platform

The analysis shows clear differences in revenue generation across advertising channels.

Key Findings:
• Google Ads generated the highest revenue contribution at approximately $2.15M.
• Email Marketing followed with $2.02M.
• Meta Ads generated $1.71M.
• TikTok Ads generated $1.05M.
• Affiliate Marketing produced the lowest revenue at $0.77M.

Business Insight:
Search-based channels such as Google Ads and Email Marketing generate the strongest revenue performance, suggesting higher purchase intent among customers reached through these platforms.

3. Marketing Efficiency (ROAS) by Platform

Return on Ad Spend (ROAS) measures how effectively advertising investments generate revenue.

Key Findings:
• Email Marketing achieved the highest ROAS at 18.02.
• Google Ads followed with a ROAS of 13.76.
• Affiliate Marketing recorded a ROAS of 11.52.
• Meta Ads delivered a ROAS of 11.41.
• TikTok Ads had the lowest ROAS at 11.27.

Business Insight:
Email marketing campaigns demonstrate the strongest return on marketing investment and could be expanded further to maximize revenue efficiency.

4. Monthly Revenue Trends

The monthly trend analysis highlights fluctuations in campaign performance throughout the year.

Key Findings:
• Revenue remained relatively stable between $3.0M and $3.6M.
• Strongest months were January and February.
• Mid-year months such as May and June experienced slight declines.
• Performance recovered gradually toward the end of the year.

Business Insight:
These patterns suggest seasonal buying behavior which can inform campaign timing and promotional strategies.

5. Top Performing Campaigns

Several campaigns consistently contributed to overall revenue generation.

Key Findings:
Top campaigns include:
• Brand Awareness
• Holiday Deals

• Winter Promo
• New Product Launch
• Flash Sale

Business Insight:
Promotional campaigns such as Holiday Deals and Flash Sales strongly influence customer purchasing behavior and should remain central components of future marketing strategies.

6. Strategic Recommendations

Based on the analysis, the following actions are recommended:

• Increase investment in high-ROAS channels such as Email Marketing.
• Optimize lower-performing channels like TikTok Ads and Affiliate Marketing.
• Leverage seasonal campaigns such as Holiday Deals and Flash Sales.
• Continue monitoring key marketing metrics including CTR, Conversion Rate, CPA and ROAS.

7. Conclusion

This analysis demonstrates the importance of data-driven marketing decisions in optimizing advertising performance. By evaluating campaign results across multiple dimensions, organizations can better understand which channels generate the greatest value and adjust their marketing strategies accordingly.

The dashboard developed for this project provides an interactive tool for monitoring campaign performance and supporting informed decision-making.
